

CANADA'S ESSENTIAL RESOURCE
ON SHEET STEEL

EASILY RECOGNIZE QUALITY

INFORMATION

Quality Product

Look for this symbol! This logo can be found on all our members' product packaging and ensures the product you're buying adheres to our strict standards of quality.

We are Canada's foremost authority on sheet steel, its products, and its many applications.

We are an impartial association, playing an integral role in the development and enforcement of industry standards. A source for technical information and resources, we also provide expert guidance to the general public and sheet steel manufacturers alike.

Our overall mission is to pursue the advancement of sheet steel as the most durable and reliable building material on the market today.

vision

INSPIRATION THROUGH
SHEET STEEL

The CSSBI can help turn design visions into realities. Sheet steel products have significant advantages over other building products, offering considerably more strength and immediate cost savings.

Always at the forefront of current designs and product technologies, our employees provide the technical guidance architects, designers, engineers, and builders need to achieve structurally sound and ambitious designs with steel.

variety

SHEET STEEL DOES
MAKE A DIFFERENCE

Engineered sheet steel products are reliable with incomparable accuracy. Depending upon application, sheet steel products may also be treated with advanced finishes to enhance their durability, provide water tightness, and more. On behalf of its members, the CSSBI promotes the following product categories:

SBS

**STEEL
BUILDING
SYSTEMS**

CUSTOM ENGINEERED AND FABRICATED BUILDING SYSTEMS

SBP

**STEEL
BUILDING
PRODUCTS**

SHEET STEEL ROOFING, CLADDING AND DECK

LSF

**LIGHTWEIGHT
STEEL
FRAMING**

COLD-FORMED SHEET STEEL FRAMING MATERIALS

RSR

**RESIDENTIAL
STEEL
ROOFING**

LOW MAINTENANCE ROOFING WITH LONG LIFE EXPECTANCIES

LSC

**LIGHTWEIGHT
STEEL
CLADDING**

FOR AGRICULTURAL AND LIGHT COMMERCIAL APPLICATIONS

facts

PROFESSIONALS INFLUENCING
INFORMATION & STANDARDS

The CSSBI employs a collection of marketing and engineering professionals dedicated to linking the public, manufacturers, and suppliers with the sheet steel products they desire. More importantly, we also work closely with industry bodies like the Canadian Standards Association (CSA) and the American Iron and Steel Institute (AISI) to develop codes and ensure the 'desired' products meet stringent standards for both quality and safety.

These standards are communicated to members and the public through CSSBI researched and written technical bulletins, fact sheets, and design manuals across all product categories.
